Hi,

I hope you are doing well

Job Title: - Business Analyst

Job Location: Lisle, IL

Job Type: - Long term Contract

Job Description

- Analysis of a customer's business needs.
- Communication with stakeholders, developers, QA and end-users if necessary.
- Software requirements analysis (different methodologies and notations could be used - wireframes, surveys, brainstorming, traceability matrices, analysis of existing documentation and competitors);
- Problem domain analysis and improvement suggestions.
- Drawing up requirements documents.
- Requirement's formalization (separation of business, user, functional and non-functional requirements as well as business rules, assumptions, and limitations);
- Requirements management (processing of change requests, analysis of risks, and description of the impact on existing requirements);
- Requirements transmission between the developers and the client
